Swedish (native), English (fluent), German (good)

EDUCATION

MSc Computer Science
Chalmers University, 2012 – 2014

Mara Lindqvist

Senior Platform Engineer

PROFILE

Platform engineer with ten years of experience building reliable cloud infrastructure for logistics and retail companies. I enjoy turning messy deployment processes into calm, well-documented paved roads that product teams actually like to use.

EXPERIENCE

Senior Platform Engineer · Nordfrakt AB

Mar 2020 – Present · Gothenburg

- Moved 140 services from hand-built virtual machines to Kubernetes on AWS, cutting release time from two days to forty minutes.
- Built the on-call handbook and the incident review routine used by eight teams.
- Wrote Terraform modules for networks, databases and queues that every new service starts from.
- Mentored four engineers who now run the platform's weekly office hours.

Systems Engineer · Kvarn Retail

Aug 2016 – Feb 2020 · Malmö

- Ran the PostgreSQL fleet behind the web shop, 30 clusters, with point-in-time recovery tested every month.
- Introduced Prometheus and Grafana dashboards for checkout latency and stock updates.
- Automated server patching with Ansible, from a full weekend of work to an unattended night run.

Junior Developer · Solvik Data

Sep 2014 – Jul 2016 · Gothenburg

- Built internal tools in Python and Go for billing reports.
- Kept the build servers running and documented how to rebuild them from scratch.
