PROFILE

Operations manager with twelve years in warehousing and road freight. I run sites where people know what is expected of them, stock is where the system says it is, and trucks leave on time. Comfortable with budgets, union talks and new warehouse software.

EXPERIENCE

Site Manager, Baltyk Logistics Jan 2019 - Present

- Run a 40,000 square metre cross-dock with 180 staff over three shifts and a yearly budget of 9 million euros.
- Cut picking errors from 1.8% to 0.4% by re-slotting fast movers and retraining team leaders on scanner use.
- Led the move to a new warehouse management system without stopping outbound shipments for a single day.
- Agreed a new shift pattern with the works council that lowered overtime by a quarter.
- Set up a weekly safety walk; lost-time incidents went from eleven to two a year.

Shift Lead, Odra Freight Mar 2014 - Dec 2018

- Planned daily loading for 60 trucks to Germany and Czechia, working with dispatch on late changes.
- Trained new forklift drivers and kept the training records ready for audits.
- Introduced a simple board for damaged goods that halved the time claims stayed open.
- Covered for the site manager during holidays, including customer calls and staffing.

Warehouse Operative, Nadwislanski Magazyn Jun 2011 - Feb 2014

- Picked and packed orders for retail customers, later promoted to team leader of eight people.
- Kept the returns area tidy and processed returns within two working days.

SKILLS

Warehouse management systems, budgeting, shift planning, labour relations, lean, forklift licence, Polish (native), English (fluent), German (basic)
