Ines Albuquerque

Porto, Portugal ines.albuquerque@example.com github.com/ines-example

Summary

Data engineer who builds batch and streaming pipelines for retail analytics. Careful about data quality, tests and documentation; happiest when analysts stop asking where a number came from.

Experience

Data Engineer, Mercado Verde *Feb 2021 - Present*

- Built the nightly sales pipeline in Python and Spark that feeds 300 store dashboards before opening time.
- Moved event ingestion from cron scripts to Kafka consumers with alerting on lag and schema changes.
- Wrote the data contract template now used by four product teams.

Analytics Developer, Tejo Seguros *Sep 2017 - Jan 2021*

- Maintained the claims warehouse in PostgreSQL and cut the monthly close report from six hours to forty minutes.
- Added row-level tests that caught duplicate policies before they reached finance.

Skills

Python, SQL, Spark, Kafka, Airflow, PostgreSQL, dbt, Docker, Portuguese (native), English (fluent), Spanish (good)
